

Messi & Paoloni Coax Supplier

URL: <https://messi.it/en/home.htm>

For 77 years this company in Italy has produced some of the best coax and connectors in the world. They are the choice for most major DX'peditions.

The new M&P cables designed for the HAM RADIO world, BROAD-PRO, ULTRAFLEX, AIRBORNE, HYPERFLEX, are all made with a screening efficiency **>105 dB!**

LMR-600-UF is only **>90 dB**.

This leads to an excellent immunity against electromagnetic interferences and low frequency impulsive noises, (responsible for the increasing of the background noise levels). Moreover, having very well screened cables, such as M&P cables, gives the Ham Radio world the chance to dramatically reduce the noise level emissions from the cable itself, minimizing troubles in urban areas. Cables such as **RG 213/U** or **RG 8**, have **55 dB** of screening efficiency, **RG 58 C/U** has **50 dB** of screening efficiency and the **extra shielded RG 214 A/U** despite its impressive dual screen, cannot show off more than **80 dB**. Compare that to the **>105 dB** of the M&P cables!

M&P Cables can be purchased from **GigaParts** or **BuyTwoWayRadios.com** or direct from **M&P in Italy**. When buying **direct from Italy** they offer **FREE Shipping** on orders more than **€99 (\$106.19)** and delivery within 3-4 Working Days!

My "custom" orders direct from Italy with **SOLDERED** N-connectors have all been **DELIVERED** in 6 total days or less!

M&P connectors are as fabulous as their coax. They have produced a **NEW** PL-259 connector (the UHF EVO) which is **AWESOME!** Watch the PL-259 video below:

There are a lot of videos for M&P cables and connectors available on YouTube. All their videos are here: <https://www.youtube.com/@MessiPaoloniSRLAncona>
Installing **THEIR** PL-259: <https://www.youtube.com/watch?v=35SWUllkVjw>

For decades I was the "Belden" guy but now I recommend **ONLY** the M&P line!
